

Technical features

Smart current detector Wireless IoT

- ✓ Volt constantly monitors the presence of electricity
- ✓ It notifies you if it detects a power outage
- ✓ It notifies you when power is restored

VOLT is a device to monitor the presence of electric current

Main features of the device:

- Alarm notification when the power goes off
- Battery level monitoring
- Daily note on the status of the electricity grid and number of alarms transmitted in the last 24 hours

Supply

- 2*AAA (included)
- Low power consumption
- 15.000 messages (depending on environmental conditions)

Communications

- Sigfox
- Internal antenna

Sensors

- Voltage monitoring
- Battery level

LED status

- Red LED: no electric current
- Green LED: electric current restored

Quick activation

- Mobile App
- QR code

Mechanical Information

- Size: 65x85x65 mm
- IP40 box
- Weight: 100 g
- Operating temperatures: -20°C / 85°C
